CONTROL UNCONTROLLABLE STUDENTS WORKSHOP

Strategies to Manage Students With Oppositional Defiant & Conduct Disorders

This workshop shows you what to do when nothing seems to work well to manage very hard-to-manage students who have or may have Oppositional Defiant Disorder or Conduct Disorder.

If you work with some students who are so out-of-control that nothing seems to successfully manage them, then this workshop has the practical, more effective solutions that you've been looking for. If you have tried nearly every method you know, but some of your out-of-control youngsters continue to be unmanageable, this session will show you how to turn that around.

This workshop explains why "nothing seems to work" with unmanageable students, and shows you what to do instead of continuing to rely on methods that never are able to make the situation better for very long. One-size-fits-all interventions fit no one. This workshop gives you interventions that are not one-size-fits-all, but have been especially designed to fit your most unmanageable children and youth. These tested, researched, well-honed techniques are especially crafted and tailored to work better than what you've been doing. These methods are critical if you teach, counsel or work with children and teens who may have, or have been diagnosed as having Oppositional Defiance Disorder or Conduct Disorder.

You'll learn exactly what the difference is between Oppositional Defiant Disorder and Conduct Disorder, two serious emotional problems that are fairly common, but are very

frequently confused by teachers and other professionals. Even more important, you'll learn which methods work with each type of disorder, and you'll get methods that you can use with or without a diagnosis.

Unmanageable youngsters pose a safety concern, and interfere with your ability to do your job. It doesn't have to be like that. Tools do exist to systematically improve the conduct of the most misbehaved children and youth, yet many youth professionals have

not been offered this training as part of their education. Stop guessing and struggling to figure out how to get unmanageable youngsters back in control. This workshop has your solutions, solutions honed with youngsters just like yours, solutions that can finally restore order to your group or classroom— even after long-term behavior problems and disruption have occurred.

You will leave this workshop with 100-200 of the best strategies and tools that exist to control uncontrollable students who evidence the problem behaviors associated with Oppositional Defiance and Conduct Disorders. You will leave this workshop with the ready-to-use, more powerful tools that you need to manage unmanageable Pre-K to Grade 12 students. You will leave this workshop well-equipped to reduce the disruptions, defiance, disrespect, verbal abuse, conflict, aggressiveness, bullying, and acting-out behavior that until now have been so resistant to improvement.
